

Thingummy Bob Doubles

This Method was called “Nervous Breakdown Bob Doubles” by Pam Copson in her Sherbourne series of booklets – but I thought that was a bit of a mouthful so renamed it!

In this method (*after Bayles*)

- The Treble leads and makes Long 5ths every time
- The 5th makes long 5ths and leads every time, just like the Treble
- The 3rd and 4th bells dodge 3-4 every time as the treble leads
- The 2nd alternately makes 2nds over the treble, then 4ths under the Treble, similar to making the Bob. This is harder than it looks!

This Method has advantages that the student gets lots of practice with **either** the 3-4 dodges **or** long places as required **AND** the usual signposts such as passing the Treble are maintained

And a “Single” to swap 3-4
